**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1 – 15, 21 and 23 - 26, drawn to an apparatus for forming curved laminations, classified in class 269, subclass 289.
  - II. Claims 16 – 20 and 22, drawn to a method for forming curved laminations, classified in class 156, subclass 296.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed be used to practice another and materially different process such as process that forms a curved lamination through mechanical connection as opposed to gluing and/or wherein as opposed to veneer portions, metal components are worked upon.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1733

4. This application contains claims directed to the following patentably distinct species of the claimed invention:

**If applicant elects Group I from the restriction above,**

Species A<sub>1</sub>, wherein the curved upper surface is defined by at least a first die board as apparently required in claims 1 – 15 and 23 – 26.

Species A<sub>2</sub>, wherein the curved upper surface is defined by the plurality of support members each having a height equal to the height of the upper curve profile desired as apparently required in claim 21.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 – 18, 24 – 30, 36, 37 and 43 are generic.

**If applicant elects Group II from the restriction above,**

Species A<sub>1</sub>, wherein the curved upper surface is defined by at least a first die board as apparently required in claims 16 – 20.

Species A<sub>2</sub>, wherein the curved upper surface is defined by the plurality of support members each having a height equal to the height of the upper curve profile desired as apparently required in claim 21.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. A telephone call was made to Beehler and Pavitt to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
